Pistol Cleaning & Storage:

- Regular gun cleaning and proper storage is an important part of the upkeep of your pistol.
- Your firearm should be cleaned after every shooting session.
- **Ammunition must not be present in the area!**
- Ensure the gun is unloaded.
- The action must be open and gun field stripped.

The Cleaning Process:

1. Attach brush to cleaning rod and apply bore cleaner to brush.
2. Run brush through bore 8-10 times.
3. Run wet patch (solvent) through bore.
4. Run dry patch through bore.
5. If the dry patch comes out dirty, repeat the above four steps until it comes out clean.
6. Run lightly oiled patch through bore.
7. Repeat the above steps for every chamber, if cleaning a revolver.
8. Use small brush and solvent to clean other parts of the gun.
9. Wipe entire pistol with lightly oiled cloth.
10. Lubricate key points on firearm.
11. Lastly, function check the firearm and safely secure outside of harms reach.

Please refer to your firearm manual for specific points of lubrication.
